Document	Type	Announcement
	Number	2021/70
	Subject	Member Tests for BISTECH System 2.15 Version Transition
	Approval Date	27.09.2021
	From	Information Technology Directorates, Market Directorates
	To	Members, Data Broadcasting Organizations (VYK) and Software Providing Members

To Whom It May Concern,

Ref: Announcement dated 08.09.2021 and numbered 2021/ 62

Previously related announcement has been shared that BISTECH System improvements and developments continue with the requirements of product and service diversity and the new version called 2.15, is planned to go live (Production) as of **November 8, 2021**.

BISTECH Member Free Test Environment (pre_prod test enviroment) will be updated on September 27, 2021 with the release of 2.15. The new version is expected to be tested and checked by members prior to deployment. Test environments information can be accessed from the BIST Connect application Verda Menu -> Application Software.

Version 2.15 is planned to include the improvements listed below:

1. The project of detailing order cancellation reasons for order cancellation messages of FIX Order Entry and FIX Drop Copy protocols, which were deployed with the 2.13 version, has been extended to cover the OUCH protocol and Trading Workstation (TW) application. In this context, order cancellation reasons are detailed in Turkish and English versions of TW applications and in OUCH Specifications document.

Beside to the above-mentioned aspect, internal developments and improvements that do not directly affect the applications used by our members but have an impact on the whole system will also be implemented. Therefore it's important for our members to test and control all system functions end-to-end.

For all the questions and issues on the subject please contact bistechsupport_autoticket@borsaistanbul.com

Kindly submitted to your information. Yours

Sincerely,

Korkmaz ERGUN
General Manager
