Subject : BISTECH SR3.0 Member Announcement and  
Technical Information Document

To Whom It May Concern,

Along with efforts to augment product and services diversity to a capable extent by responding to our members' demands, the system improvement and development efforts have been carried out thoroughly by the Exchange. In this context, a new version called BISTECH 3.0 is planned to be launched, by the end of the first quarter of 2023.

The overall scope of the BISTECH 3.0 version is to increase the number of the partitions and to adapt the trading system architecture to dynamic load distribution. The new version involves some architectural changes, especially applications related to user management of current FIX/OUCH/ITCH protocols. BISTECH 3.0 Technical Information Document presented as attachment elaborates referred developments within the scope of designed version. At this stage, our members are expected to review the Technical Information Document and make preliminary preparations and planning by evaluating how the changes specified within the framework of BISTECH 3.0 transformation will affect their business models, and the changes that need to be made at the protocol and user levels. Considering the feedback from our members, detailed information about the user sets that will be valid in BISTECH 3.0 will be announced at a later stage.

For all the questions and issues on the subject please contact [bistechsupport\\_autoticket@borsaistanbul.com](mailto:bistechsupport_autoticket@borsaistanbul.com)

Kindly submitted to your information.

Yours Sincerely,

Korkmaz ERGUN  
CEO  
Board Member
