DERIVATIVES MARKET

FIX CERTIFICATION PROGRAMME

ORDER ENTRY STAGE

………………………………………………………………… BISTECH FIX ORDER ENTRY STAGE CONNECTIVITY TEST

To The Attention of Our Members:

The purpose of this test is to enable our members to test their own systems as they are in BISTECH

FIX environment.

Certification process consists of the sections below:

1. Connectivity Test

2. Order Entry and Functionality

       a. Base Level

       b. Medium Level

       c. Advanced Level

       d. Market Making

3. Closing the System

Equity Market BISTECH FIX certification (base or advanced levels) will be valid for Derivatives Market BISTECH FIX certification (base level only) as well. Those members who have been certified for Equity Market can skip Connectivity Test Section, Base Level steps in Order Entry and Functionality Section and Closing the System Section. Likewise, the members who have been certified for Market Making in Equity Market can skip the Market Making steps in Order Entry and Functionality Section. For the members who have been certified for Equity Market;

If they want to have Base Level certificate for Derivatives Market, no additional certification process is required.

If they want to have Medium Level certificate for Derivatives Market, only Medium Level steps in Order Entry and Functionality Section is required.

If they want to have Advanced Level certificate for Derivatives Market, both Medium Level steps and Advanced Level steps in Order Entry and Functionality Section are required. For the members who do not have any BISTECH FIX certificate, Connectivity Test Section, Base Level steps in Order Entry and Functionality Section and Closing the System Section are required. But Medium Level, Advanced Level and Market Making steps are optional.

Please perform the transactions below in order and make sure to check the messages incoming at every step when you carry out these transactions.

First, determine the impact expected to occur when order is sent to the system. When a transaction is sent to the system, the integrity of the message and whether it is accurately

processed in the system of the member or not is controlled. After that control, the proper checkbox under each step will be ticked regarding whether expected impact occurred or not (Expected messages are received / Problem with messages).

Inform the officers immediately if an unexpected situation occurs. Please send the document to Borsa Istanbul officers after filling the part at the end of it.

Legal Liability fully pertains to the member in disputes which may arise between the customers and members who do not use optional order and transaction functions, in their FIX programs, which are taking part in existing transaction rules of Derivatives Market and allowed by Derivatives Market to be used with BISTECH FIX.

For this reason, we recommend our members to inform their customers on this subject and form the proper legal basis with their customers.

Our members are fully responsible for faultless operation of their own member systems.

Reference Data (Security Definition, Security Status, Price Limits vs.) regarding the instruments that are listed will be available through FIX Reference Data connection.

Notes

- ✓ Orders should be Limit priced Day and Position = Open orders unless it is noted otherwise.
- ✓ For the members who do not support order amendment (OrderCancelReplace) message, order cancelation + new order submission can be used instead of order amendment. In that case, order priority is lost even if order amendment may keep the order priority.
- ✓ Orders should be submitted with Account = "DE-1".
- ✓ For On Close and GTS orders, the value of "KAP" session in FIX protocol is "1".

DropCopy Connection

Connect to the DropCopy Port (will be given before test) with FIX DropCopy user. User should be stay connected during the test. After test is completed, message log file of DropCopy connection will be requested in addition to the message log files of FIX Order Entry connection.

➢ Send Logon message with resetting sequence number and receive Logon message from the system.

MARKET MAKING

Notes

✓ Quotes should be Limit priced Day and Position = Open orders unless it is noted otherwise.

✓ There will be no response from the system for successful MassQuote entries. MassQuote Acknowledgement message will be sent if one or more Quote entry has incorrect value. MassQuote message will be validated by Exchange operator and user will be informed.

✓ It is strongly recommended that the QuoteIDs are taken from the same numbering series as the ClOrdID in cases where Orders and Quotes are submitted through the same FIX session. This principle is applied for test steps below and previously used ClOrdIDs/TradeReportIDs are not used.

✓ "QuoteEntryID" value that will be given to each quote entry is started from 1 and incremented by one for each quote entry. Given QuoteEntryIDs are expected for MassQuote messages that include more than one quotes.

✓ Entered successful MassQuotes will be checked from Trader Workstation by Exchange Operator.
