(*) Basis point is a unit of measurement used commonly in international financial markets for indicating the changes in interest rate calculation and abbreviated as BPS. Basis point represents the 4th decimal of number (0,0001) and corresponds to 1% of 1% of a number. In other words, it is a financial unit of measurement in value of 1/10.000. Whilst 1 basis point is equal to 0,01%, 100 bps is equal to 1%.

(**) The main exchange fee ratios have been approved by the Board's 9th meeting on April 3, 2015 in accordance with the statement no 32992422.299-533-3610 dated April 3, 2015 which has been sent to Borsa İstanbul A.Ş. by Capital Markets Board of Turkey (CMB) and other fees have been approved by the Board's 11th meeting on April 10, 2014 in accordance with the statement no 32992422-850-5071 dated May 16, 2014 which has been sent to Borsa İstanbul A.Ş. by CMB

- (1) 50% discounted rate over main exchange fee ratio (0.25) for the days on which price quotation responsibility is fulfilled on equities that the market maker is assigned
- (2) • "Ratio of Number of Erroneous Transaction Corrections" is calculated by dividing the number of erroneous transaction corrections by the total number of transactions executed by a BIST member on the Equity Market on a monthly basis.
 - Erroneous transaction correction is made via Clearing Office Terminal in the following day (T+1) in the system of Takasbank (İstanbul Clearing, Settlement and Custody Bank Inc.) and corresponding correction fees are charged by Takasbank.
 - Takasbank reports whole erroneous transaction corrections to Borsa İstanbul periodically.
 - For commencing disciplinary proceedings, the thresholds outlined in the table above will be applied for the erroneous transaction correction notifications for the Equity Market.
- (3) • At continuous auction all cancellations, price worsening and volume reductions not including the orders at the best bid and ask price level are subject to an exchange fee of 0.1 bps over the total/reduced value for normal orders.

- At call auctions all cancellations, price worsening and volume reductions are subject to an exchange fee of 0.125 bps over the total/reduced amount for normal orders.
- At continuous auction fees for cancellation/volume reduction and price worsening for the orders at the best bid and ask price level are charged in accordance with the following structure:
 - If done within 5 seconds following the transmission to the trading system/the last change (including 5th second), the fee will be 0.625 bps.
 - If done between 6th and 10th second following the transmission to the trading system/the last change (including 10th second), the fee will be 0.375 bps.
 - If done after 11th second following the transmission to the trading system/the last change, the fee will be 0.250 bps.
- Order cancellations, price worsening and volume reductions for warrants and certificates are not subject to any fee.
- For fixed and variable price methods applied in primary market transactions, a flat rate of 0.125 bps will be applied.
- Cancelling pending trade reports are not subject to any fee.
- Cancellations, price worsening and volume reductions, done in trades at closing/single price session will be subject to the pricing structure designed in accordance with the best bid and ask price levels while transactions carried out in the call auctions are subject to a flat rate.
- System cancellations on non-matched (or on non-matched parts of) imbalance, market, market to limit, limit immediate or cancel orders (Fill and Kill, FaK) are not subject to order cancellation fees. However, cancelled/modified imbalance, market, market to limit, limit FaK orders by the users in call auctions will be charged with the rates in the row numbered 12.5 above.
- All orders inactivated because of the “cancel on disconnect” preference and the ones that are “mass cancelled” via PTRM are charged with the related fees above depending on the session state where the cancellations took place.
- Order cancellations, price worsening and volume reductions for midpoint orders and quotes are not subject to any fee.
- Order cancellations, price worsening and volume reductions for odd lot (.KE) and VWAP (.AOF) series are not subject to any fee.
- Order cancellations, price worsening and volume reductions regarding total quantity for iceberg orders are not subject to any fee. Cancellations, price worsening and volume reductions, done in shown quantity of iceberg orders will be subject to the pricing structure designed in accordance with the best bid and ask price levels like normal orders
- Exemption of ETFs from order modification/cancellation fees is extended to 2018, also transactions on ETFs will not be subject to any exchange fee charges in 2018.

Note-1:

- HFT users will be provided a specific user to separate the user's activities from regular client orders, upon application. It is obligatory to have a discrete user for each HFT based order transmission algorithm. These users are exempt from conventional order cancellation/modification fees, instead they are subject to OTR.
- OTR refers to number of orders placed/modified/cancelled over number of executed transactions of the HFT user. OTR is used as the parameter of which excess usage charges for HFT users are set upon.
- In cases where the number of orders placed, modified or cancelled over number of trades exceed the ratio of [15:1], a fee of 0.03 TL is to be charged per each order placed/modified/cancelled in excess.
- Calculations will be made daily, and fee will be accrued along with the Exchange fees on a monthly basis.
- There will be no change in the transaction fees for this users.
- OTR is calculated on a user basis. In cases where a member has more than one of this type of user, their details will be shown in consequent lines in that member's exchange fee report.
- Information regarding the calculation details is accessible from <http://www.borsaistanbul.com/en/products-and-markets/markets/equity-market/exchange-fees>

Note-2:

Upon the approval of the Capital Markets Board on 18/01/2018 a new rebate model for the exchange fees will be implemented in Equity Market effective as of 2018. Basic elements of the model are given below. The model consists of a combination of two different exchange fee rebate models. The first model is based on a size criterion which is amount of value traded by each member in the Equity Market in the calculation period. The second model is based on the growth of value traded by each member between two consecutive calculation periods. The total amount of funds to be rebated to each member is equal to greater amount of the rebate calculated on the conditions of these two criteria. In other words, each member can get rebate from only one of these criteria (the greater one as the amount) in a calculation period.

Size Criterion: Members which make at least 5% of the total value traded in Equity Market in a quarter of a calendar year with a minimum trade value of TL 30 billion (except for Trade Reports, Wholesale Trades, Public Offering and Primary Market transactions), will be rebated by 5% of the exchange fee paid in the in the following quarter.

Growth Criterion: This criterion is based on the quarterly growth of value traded by each member. If a member has been charged more than the previous quarter, 30% of the exchange fee difference will be rebated to that member. Trade Report and Wholesale Trade fees, Public Offering and Primary Market transaction fees, OTR fees, order cancellation/volume reduction/price worsening fees are not included in calculation of the difference. The member won't be rebated if it is charged for less than previous quarter.

Total Amount of Rebate: The total amount of funds to be rebated to each member will be the greater one of the rebate amount calculated on these two criteria by a quarter of a calendar year.

Within the scope of above mentioned new rebate model:

- Members that make at least 5% of the total value traded in Equity Market in a quarter of a calendar year with a minimum trade value of TL 30 billion (except for Trade Reports, Wholesale Trades, Public Offering and Primary Market transactions), will be rebated for 5% of the exchange fee in the last month of the quarter.
- Exchange fee which is taken basis for rebate calculation does not include Trade Report and Wholesale Trade fees, Primary Market transaction fees, OTR fees and order cancellation/volume reduction/price worsening fees.
- Rebate amount is calculated on the amount of the exchange fee accrued for the relevant period and is deducted from the exchange fee calculated for the last month of the relevant quarter (for example, members will be rebated in March for the first quarter).
- In terms of growth model, members which are charged increasing amounts of exchange fees between two consecutive quarters are rebated -in the last month of the present quarter- by an amount that makes 30% of the difference accrued as exchange fee between consecutive quarters.
- Trade Report and Wholesale Trade fees, Public Offering and Primary Market transaction fees, OTR fees and order cancellation/volume reduction/price worsening fees are not included in difference calculation.
- The total amount of funds to be rebated to each member will be the greater one of the rebate amount calculated on these two criteria by a quarter of a calendar year. That is, only one of the two criteria will be basis for the amount of rebate (according to which the rebate amount calculated higher).
- Rebate amount is calculated on the exchange fee accrued for the relevant period. Calculated amount is deducted from the accrued exchange fee calculated for the last month of the present quarter (for example, members will be rebated in March for the first quarter) beginning from the first quarter of 2018 (based upon trades in 2017/ 4).
- Rebates are calculated for every quarter of a calendar year (January-March, April-June, July-September, October-December).
- The new rebate model is effective as of 2018.
