1 BISTECH TEST ENVIRONMENTS

1.1 Test Environments General Information

This document has been prepared for general information about member test environments.

All free member test environments serve all markets (Equity Market, Derivatives Market, Fixed Income Market and PMD).

1.2 Market Rules

There is no difference in test environments related to the rules of the markets. Planned changes and improvements can also be implemented in test environments. These rules can be accessed via the links below:

The market rules in the markets can be accessed from the Market Procedures.

<https://www.borsaistanbul.com/en/sayfa/4028/procedures>

		PROD-LIKE TEST ENVIRONMENT	PRE-PROD TEST ENVIRONMENT
General Info		It is a test environment with the same software version as the production system. In the test environment, the instruments and their prices may differ from the production system.	If there is a new release plan, it is first released for testing in this environment. Otherwise, it has the same software version as the current production system. In the test environment, the instruments and their prices may differ from the production system.

2 BAP TESCİL TEST ENVIRONMENT

Transactions can be transmitted to the BAP Tescil Test System over remote access lines (VPN) by logging into <https://test-tescil.borsaistanbul.com> with the internet network interface (WEB) user and/or using the Tescil API (application programming interface).

For each investment institution that is a member of Borsa İstanbul, 2 internet network interface (WEB) users and 1 API user were defined and user names were uploaded to <https://connect.borsaistanbul.com>. BAP Tescil users are anonymous users defined for the investment institution, and the investment institution is responsible for the security and updating of codes and passwords. User names are defined to be valid on the BAP Tescil Test system. In order to access the test environment, members can learn their user passwords by contacting the relevant business unit at bap@borsaistanbul.com.

Borsa İstanbul member investment institutions will be able to access the BAP Tescil System at <https://test-tescil.borsaistanbul.com/> on their computers with Borsa VPN connection.

IP Info: 10.57.3.43

In order to perform IP/Host resolution correctly, the IP address of 10.57.3.43 must be added to the DNS or host files, and if necessary, the necessary permissions must be granted to access the <https://test-tescil.borsaistanbul.com> address in the firewall settings.

After the user accesses the system, detailed information about the WEB/API application can be accessed by using the info button.
