

# EQUITY MARKET BISTECH OUCH CERTIFICATION PROGRAM

November 2020, Version 5.0

## EQUITY MARKET BISTECH OUCH CERTIFICATION PROGRAM

| A.Ş.'             | BISTECH | OUCH | ORDER | ENTRY | STAGE |
|-------------------|---------|------|-------|-------|-------|
| CONNECTIVITY TEST |         |      |       |       |       |

To The Attention of Our Members:

The purpose of this test is to enable our members to test their own systems as they are in BISTECH OUCH environment.

Certification program consists of two levels; Basic Level and Market Making. Market Making builds upon the Basic level testing certification so the participant is obligated to have the based level certification first.

Order entry part of the test is segmented according to required phases of routine operation. It comprises Opening Session, Continuous Transaction and Throttling (Maximum number of orders allowed in unit time) test sections.

Please perform the below transactions in order and make sure to check the messages incoming at every step when you carry out these transactions.

First, determine the impact expected to occur when order is sent to the system.

Whether expected impact occurred or not after order or any request is sent to the system will be controlled by dimensional and contextual integrity and accuracy of the response which reached you with respect to the activity at the first degree. By controlling whether the activities are accurately processed or not at your main system which is the source of the activities carried out from every channel at the back in the second degree, proper blanks below each option will be ticked.

Inform the officers immediately if an unexpected situation occurs.

Please send the document to Borsa Istanbul officers after filling the part spared for you at the end of the test.

Legal Liability fully pertains to the member in disputes which may arise between the customers and members who do not use some of order and transaction functions in their OUCH programs which are taking part in existing transaction rules of Equity Market and allowed by Equity Market to be used with BISTECH OUCH.

For this reason, we recommend our members to inform their customers on this subject and form the proper legal basis with their customers.

Our members are fully responsible for faultless perform of the member system.

| ( ) Expected messages are received. ( ) Problem with messages  |

1. Login Request Packet

## **SECTION 2:**

### **ORDER ENTRY AND FUNCTIONALITY**

## <u>Instruments that will be used during test are listed below with Partition, Base Price and</u> OrderBookID information:

| Enstrüman | Part | Baz Fiyat | Order Book ID |
|-----------|------|-----------|---------------|
| ADANA.E   | 1    | 6.000     | 70636         |
| ALCAR.E   | 1    | 5.000     | 71116         |
| ASELS.E   | 1    | 5.000     | 71536         |
| FRIGO.E   | 1    | 0.210     | 74136         |
| GARAN.E   | 1    | 6.000     | 74196         |
| TCELL.E   | 2    | 7.000     | 78296         |
| ZOREN.E   | 2    | 5.000     | 79596         |
| ABCDE.V   | 1    | 5.000     | 136335        |
| DJIMT.F   | 1    | 5.100     | 73136         |
| GLDTR.F   | 1    | 8.200     | 74456         |
| BNKTR.F   | 1    | 16.100    | 72196         |
| IST30.F   | 1    | 0,540     | 75356         |
| FBIST.F   | 1    | 5.000     | 73956         |
| GOLDP.F   | 1    | 6.100     | 74556         |

Reference Data (Security Definition, Security Status, Price Limits etc.) regarding the instruments that are listed will be available through FIX Reference Data and ITCH Market Data connection.

#### **Order Details:**

- ✓ For Order Entry via OUCH Protocol, OrderBookID (SecurityID) of the instrument must be used instead of Symbol name. OrderBookID of the instruments that are used for Certification Test are given on the table above.
- ✓ Orders should be **Limit** priced **Day** and **Client** orders unless it is noted otherwise.
- ✓ For orders with AccountType **FUND**, AFK field (Client/Account) with **XRM** value must be included in the order.
- ✓ Values sent in Account and Reference fields will not be checked (pass-through fields). These are mandatory fields OUCH protocol and should be sent in compliance with below table (Enter Order) which originally published in OUCH Specification Document.

| Name           | Offset | Length | Value | Notes                      |
|----------------|--------|--------|-------|----------------------------|
| Client/Account | 34     | 16     | Alpha | Mandatory for Fund orders. |
|                |        |        |       | Agency/Fund Code (AFK)     |
| Customer Info  | 50     | 15     | Alpha | Client Reference field.    |
| Exchange Info  | 65     | 32     | Alpha | Client Account number.     |

Clients are allowed to send Cancel Order and Enter Order (New) messages instead of sending Replace Order. Please note that cancelling an order and sending a new one will definitely cause losing the time priority of the order while it is possible to retain the time priority with Replace Order message in certain circumstances.

#### **DropCopy Connection**

Execution Report messages of Order Entry/Replace/Cancel messages that are entered via OUCH protocol will be received over FIX DropCopy connection. Clients will be provided with DropCopy connection details to be used during the Certification Test on request.

Default configuration of DropCopy connection is aimed at receiving messages of all users of the participant without any filter (FIX, TW, OUCH). It is possible to configure the DropCopy connection to receive messages of specific users.

#### **OPENING AUCTION**

1. ADANA.E enter orders listed below and receive Order Accepted messages.

| i.    | ADANA.E - BUY - 200 lot - 6.200 TL - Day - Client           | [Order Token=10]  |
|-------|---|-------------------|
| ii.   | ADANA.E - BUY - 90 lot - 6.090 TL - Day - Client            | [Order Token=20]  |
| iii.  | ADANA.E - BUY - 80 lot - 6.080 TL - Day - Client            | [Order Token=30]  |
| iv.   | ADANA.E - BUY - 70 lot - 6.070 TL - Day - Client            | [Order Token=40]  |
| v.    | ADANA.E – BUY – 60 lot – 6.060 TL – Day - Portfolio         | [Order Token=50]  |
| vi.   | ADANA.E – BUY – 50 lot – 6.050 TL – Fill and Kill - Client  | [Order Token=60]  |
|       |   |                   |
| vii.  | ADANA.E - SELL- 10 lot - 6.200 TL - Day - Fund - AFK: XRM   | [Order Token=70]  |
| viii. | ADANA.E - SELL- 20 lot - 6.100 TL - Day - Client            | [Order Token=80]  |
| ix.   | ADANA.E - SELL- 250 lot - 6.260 TL - Day - Portfolio        | [Order Token=90]  |
| х.    | ADANA.E - SELL- 350 lot - 6.270 TL - Day - Fund - AFK: XRM  | [Order Token=100] |
| xi.   | ADANA.E - SELL- 450 lot - 6.280 TL - Day - Fund - AFK: XRM  | [Order Token=110] |
| xii.  | ADANA.E - SELL- 550 lot - 6.290 TL - Day - Fund - AFK: XRM  | [Order Token=120] |
|       |   |                   |

14. ALCAR.E modify quantity of your partially traded order and receive Order Replaced message.

<sup>\*\*</sup> Order with original quantity of 100 lots is partially executed and remains 40 lots in the orderbook before modification. When order is modified as 50 lots, partially executed quantity will be extracted and passive order in the orderbook will be deleted. Check and confirm that 0 is received in the Quantity field (Quantity=0) and Order State = 2 (Not on book). Please note that PreTrade Quantity field is received as 0 (zero) in the Order Replaced message. (This warning messages is for users who send Order Replace for order modification.)

#### **Failover to Secondary Gateway**

Terminate connection with Primary OUCH Gateway IP and Ports and connect to secondary OUCH Gateway IP and Port provided.

| Send Login Request Packet without resetting Sequence number (with the last sequence<br>number received from system) and receive Login Accepted Packet.  |
|---|
| ( ) Expected messages are received. ( ) Problem with messages   |

| End of Day Batch.   |

## **SECTION 3:**

### **MARKET MAKER FUNCTIONALITY TEST**

#### **Notes**

- ✓ In order to participate in Market Making functionality tests, the basic level test steps must be completed in the certification test document.
- ✓ Orders should be Limit priced, Day and Client orders.
- ✓ Values of Account and Reference fields will be checked for only steps that indicate these values in the scenario. These fields should be sent in compliance with OUCH Specification document.
- ✓ PartyID of MassQuote messages must be "PYM".
- ✓ There will be response from the system for successful MassQuote entries. MassQuote
  Acknowledgement message will be also sent if one or more Quote entry has incorrect value.

  MassQuote message will be validated by Exchange operator and the user will be informed too.
- ✓ It is strongly recommended that the Quote IDs are taken from the same numbering series as the Order Token in cases where Orders and Quotes are submitted through the same OUCH session. This principle is applied for test steps below and previously used Order Tokens/TradeReportIDs are not used.
- ✓ "QuoteItem" value that will be given to each quote entry is started from 1 and incremented by one for each quote entry. Given QuoteItems are expected for MassQuote messages that include more than one quotes.
- ✓ Entered successful MassQuotes will be checked from Trader Workstation by Exchange Operator. The user will be received message for successful entries.
- ✓ Confirmation messages regarding the orders and trades carried out should be checked by the member as follows;
  - Mass Quote Acknowledgement or Mass Quote Rejection messages must be received from OUCH channel
  - Quote Status Report, Execution Report and TCR messages must be received from Drop Copy channel
- ✓ The basic functions of the system are controlled in OUCH Market Maker Certification test scenarios. The relevant session transaction types and the tools that can be used are defined by general rules and may differ.
